

BIRTH CERTIFICATE

Today the average person is unaware that they are indeed a *slave*, with almost all of their wealth and freedom being stolen from them throughout their life.

This unseen slavery is linked to "*your*" *Birth Certificate*, the *legal system* and the modern day financial and *monetary system*, but it all started with your name.

Law of the Sea

Eons ago *Man* and *Woman* were considered opposite but interconnected forces, or the "*Yin-Yang*" of life.

Although both were different they depended on each other for life to exist.

Many ancient cultures considered the meeting of the *land* with the *sea* to symbolise this, with the *law of the sea* being *feminine*, and the *law of the land* being *masculine*.

This is why throughout history, the sea would be referenced in the *feminine*, with "*enchantment*" of the sea being an allegory to how women enchant men, and was symbolised with *mermaids* and "*sirens of the sea*".

All ships are referred to with feminine pronouns, with names and figureheads often being female.

The *law of the land* was considered *masculine*, as land would give stability and security, with the man often becoming the provider and protector of his woman and child.

Today maritime law has become the rape of the *feminine*, with the theft of her *child*.

Your Name

Your name is not yours; it is given to you, usually by your parents.

There is no law saying you must have a name, but it is useful to have one if you wish to interact and *contract* with others.

It is the *name* that is used within a *contract* to "*represent*" you on paper, and it is this vulnerability of requiring a name that is exploited by those who control the system.

For something to be given to you the giver must have full and complete title to it, this also includes your name.

Note: Although you have "*ownership*" and use of "*your name*", it continues to exist even after you die and is then no longer in your control.

Once you are given something, including your name, you must be sure you have full and complete title to it. It is unlikely that any loving parents would give their new born child a name with strings attached, however they are tricked into doing just that.

The people behind the system knew they could never control your name, so instead devised a scheme of tricking you into accepting **"their"** name, under **"their"** full control.

With this deception you have been turned into a **bonded slave**.

Note: The Latin word **Nomen** or **"no-men"** is the root word which leads to the Germanic word, and then old English word **"nama"** or **"noma"** meaning **"name"**.

Nomen in Latin means name, race, family, nation, fame, a thing or person, and a **debt**.

Birth

When you are born, in a state hospital, it is referred to as your birth or **"berth"**, which is carried out by a **"doctor"**; however the word **"berth"** is a shipping term, within **maritime** or **mercantile** law.

Note: Doctor means **"Dock-Tender"** a person who **"attends"**, or **"functions"** at the dock. They are **"docking a vessel"** meaning the birth of a baby from its mother's water.

The term **"berth"** means when a **ship** or **vessel** has left its allotted place at a wharf or **dock**, which is usually conducted by a **"doctor"**.

So the date of **"berth"** is when your name was registered with the system and recorded by the **"doctor"**, who works for the **"shipping company"** within **commerce** using **mercantile** law.

When asked what is your date of **"berth"** they are asking for the date your mother or **"vessel"** was **"berthed"** at the **"dock"** and delivered the **"cargo"** meaning you.

It would be advisable to question this and ask them **"do you mean when was I born?"**

Note: When you are unwell, you **"dock into harbour"**, a **doctor** will offer you a **contract** of illness, and if you accept will enter into an **agreement** to buy drugs. You have now **"contracted"** an illness and are in debt to the **doctor** for the drugs.

Foundling Hospitals

All State maternity hospitals are actually **"foundling hospitals"**. Foundling is a place where abandoned goods are shipped to be discarded, at which time someone else can take ownership.

This means the parents, primarily the mother, are tricked into abandoning their newly born child.

So, this is done when you have just been **"berthed"** and taken by the doctor, who then lifts the baby or offspring up from the **"mothers water"** so that the baby does not touch land, thereby placing the newly born baby under the jurisdiction of maritime law.

This **"lifting of the baby"** is done immediately after birth, requiring the abrupt cutting of the umbilical cord, which results in trauma being unnecessarily applied to the new born baby, or offspring.

The umbilical cord should never be cut, but left attached to the new born baby and will separate naturally when the time comes.

Note: The word **“offspring”** is based on the Latin word **“prolificus”**, meaning to be **“prolific”**, or to make **“offspring”** which comes from Middle English **“of-spring”**.

The origin of a river, which reaches the sea, is a spring; you **“spring”** from your mother’s water.

Once this action has been carried out by the doctor, the baby has now become **“abandoned goods”**, which breaks the bond between mother and child.

This is all carried out on a hospital **“ward”**; ward is a prison term.

Note: Prisoners are securitized commodities, with their prison paperwork being monetized, generating millions for the private prison corporation. Children are treated the same from birth.

Hospital Records

When you are **“live born”**, the statistics of your **“live birth”** are catalogued, using the **birth notification form**, creating a **“manifest”**, which in turn creates hospital records, which are then used to create a **bond**.

These **“bonds”** are sold to government entities or the Vatican by the hospital, as the child is now a **“ward of the state”**.

Note: Most if not all state hospitals operate as trusts, with the **board of trustees** of said hospital in full knowledge that **“hospital bonds”** are being created with every new birth.

The **certificate of live birth** is a **“trust instrument”**; with the modern day version being modelled on the American version that was applied to the children of **“freed”** black slaves after the 14th Amendment was passed by the Senate on June 8th, 1866, and ratified two years later, which granted the slaves **“citizenship”**.

Note: This **birth certificate** or **“trust instrument”** is **legal tender**, and the foundation for all **legal tender** used as money throughout the world.

There are four parts to the **Birth Notification form** as used by the **UK Corporation**, as follows:

1. **White Copy**; is sent to the Registrar of Births.
2. **Yellow Copy**; is sent to the director of public health and medicine.
3. **Green Copy**; is sent to the National Perinatal Reporting System (NPRS), and the Healthcare pricing office (HPO).
4. **Pink Copy**; stays with the hospital for their own records.

Note: **Perinatal** means relating to the time, usually a number of weeks, immediately before and after birth.

Ward

A **ward** is a jurisdiction where the people, who have consented to be within said jurisdiction, have given up their power of attorney and are now considered **“minors”** without capacity or responsibility to make their own decisions, so said decisions have to be made for them.

For example: within the electoral system, a **ward** is a “**local authority**” operating inside a geographical area being offered for electoral purposes, such as voting.

However the unsuspecting voter is made to use a form that is **not** under their jurisdiction, but that of the local council, requiring them to mark an “**X**”, written in black ink, against the party they wish to vote for.

Marking an “**X**” in this way is the signature of a simpleton unable to make their own decisions, and who has agreed to hand over power of attorney to the state.

Note: It is people with no title to land, but who live on land owned by someone else who vote; if you own your land you “**elect**”, you do not “**vote**” on a selection.

Ward of the State

Once born in a state hospital, the **child** becomes “**abandoned goods**”, and is then claimed and recorded by the corporate state.

However it is not the living baby that is abandoned, but the **infant**, which is a **legal title** as is the word **baby** written in **all caps**.

Note: **Infant** is originally a **Latin** word meaning “**unable to speak**” and is the basis for the word **Infantry**, meaning “**foot soldier**” with the **lowest rank**, who is **too inexperienced** and therefore cannot speak.

You are considered an **infant** up to the age 7, then a **minor** up to the age 14, where you have reached the “**age of consent**”, and are supposed to claim your trust at 21.

When recorded, this paper record or “**certificate**” gets sold, monetized and traded on the stock market.

The birth certificate, to “**certify the goods**”, is printed on “**bond paper**”, which is a type of paper that is made from linen, rather than wood, and has a greater weight than standard paper, usually 60 g/m² or more.

This paper is often water-marked and was also used in the creation of early bank notes, as well as government bonds.

This securitization is based on the hospital’s maternity records, where a **manifest** of the child is recorded, such as:

- Name of child.
- Date of birth.
- Sex of child.
- Birth weight and length.
- Place of birth.
- Name of father.
- Birth registration number.

Note: Your birth weight is transferred into a value based on the same weight in gold, and is used to initially set up a trust in your name; this is where the phrase **“worth your weight in gold”** comes from.

The process of securitization is done through the signature of a certifying official working for the hospital in conjunction with the Birth registration number, and the footprint that was made by placing the baby’s foot up against the **“contract”**.

Note: It is in this signing using the infant’s foot that the soul has been offered, which is then taken through baptism. Hence the word **“sole”** or **“soul”**.

A bond or debt is created from this paperwork and the new born baby has been signed as the **surety** for the bond and will now spend the rest of its life servicing this debt, resulting in approximately 95% of the child’s lifetime wealth going to the holder of said bond.

The parents will be given a copy of the hospital records but, because the parents are illiterate, they will not, and do not, understand what is truly written.

Ward Meaning:

- A minor subject to **Wardship**.
- A person, who by reason of incapacity, such as minority or mental illness, is under the protection of a court either directly, or through a guardian appointed by the court. Also called **“ward of court”**.
- A person or body of persons under the **“protection”** or tutelage of a government.

Note: If you hire an attorney you are considered a **“ward of the court”**, which is a child without mental capacity to make your own decisions, irrespective of how old you are.

Registration

Registering anything means it is not yours anymore, and usually you are left with nothing more than the **user rights**, often requiring **“permission”** to use in the form of a **“licence”**.

Note: The word **register** comes from the Latin word **“Regis”** meaning **“of the king”** and the suffix **“ter”** means **“to perform the action”**; ergo handing over to the king.

The **property rights** is now owned, in trust, by the corporation the item or child was registered with. Therefore you are the **“holder”** or **“keeper”** and not the **“owner”**.

Note: The words **“Parent”** and **“child”** are legal titles, with the word **“child”** or **“children”** meaning chattel owned by the state.

The parents or mother and father are no longer the **“legal”** parents, but have become nothing more than just **“custodians”** of a child owned by the state.

This is why **“social services”**, **“public schools”** and **“hospitals”** can now claim ownership over the child, often fining the parents, seizing the child, or even imprisoning the parents.

Naming the Child

Parents are tricked into thinking they give the baby its name, when in fact it is the hospital, through the signature of the **“certifying official”** that issues a **“surname”** to the child.

Note: Surname means **“slave name”** and is corporate; meaning it is a **“legal fiction”** under the control of the **Vatican** and is why you need a **“marriage licence”** or need to ask permission to conduct a marriage or **“corporate merger”**.

So, a surname, under the control of the **Vatican** is added to the **birth certificate form**, this is referred to as **“printing the name into form”**; meaning the **“surname”** is written on the hospital’s form.

This entrapment is done using the four corner rule, block capitals, italic fonts, symbolism and words within margins.

Hieroglyphic or symbolic language is used to further hide the truth.

For example: Crosses are placed in and around such forms, sometimes in areas where signatures are required, however the cross means **“dead”** and can also mean **“pre-signed”** by someone else; ref. mortgage contracts.

Note: In most cases within corporate countries, the **“birth certificate”** and **“death certificates”** have the same number. This number is referring to the original bond and/or trust, which has now gone unclaimed after death.

If the trust goes unclaimed upon death then it is claimed by the **banking system** and is used to either cancel debt created by the credit of the trust, or is used to generate more revenue on the outstanding debt in the way of further interest payments.

You have until your 21st birthday to claim this trust; this is why you are given a **“key”**, which is to open your trust.

Note: Dog tags worn by soldiers were created to streamline this process of closing these trusts after death, so the banks could collect more quickly.

Summary: However, as most of the world know nothing of this, the illiterate parents just fill in the blocks on the form without knowing what they are doing, and the cycle of creating more disposable **“human resources”** continues.
